Quantitative calculations involving reactions in solution are carried out in the same manner as we discussed in Chapter 11. Instead of masses, however, we use volumes of solutions of known concentration to determine the number of moles of reactants. Whether we are dealing with volumes of solutions of reactants or masses of reactants, the coefficients in the balanced chemical equation tell us ...

Information and Communications Technology has revolutionised the ways we process, access and use information and, as computers and other devices become ever more powerful, and information becomes more readily available, the next generation will need to be able to interact with digital media effectively to exploit these amazing new technologies to their full potential for the benefit of society. It is therefore imperative that teachers become familiar with ICT and

its true potential and can present information with a perspective similar to that which the present generation of young people is using to develop their interests in their everyday life. This resource from the RSC gives teachers of chemistry the practical help needed to integrate ICT into their teaching and stimulate the enthusiasm of a new generation of scientists in the exciting new areas of chemistry that are opening up such as Nanoscience and Nanotechnology.

Furthermore, it will be highly effective in developing the new ethos of sustainability that will be a major driving force behind the next advances in chemistry that are vital if we are to survive the manifold problems confronting society in the next few decades. This

Like the 1993 edition, this iteration does not assume that students, lab technicians and scientists have mastered the prerequisite calculation skills for quantitative problems in the chemical/ biomedical sciences. A new chapter focuses on using spreadsheets and laboratory information management systems. Other chapters cover calculations and techniques relevant to reagents, chemical reactions, properties of gases and solutions, pH and buffer preparation, spectrophotometry, enzyme assays, and radioactivity.
