The key to aquaponics is the natural bacteria found in the growing bed (called the biofilter) . The bacteria eat ammonia and turn it into nitrates, which are great food for plants. Without these nitrifying bacteria, the fish would die in their own waste. Without the nitrates, the plants wouldn't have anything to eat.

Aquaponic Gardening: A Step by Step Guide for Beginners This book will give you an insight on how to produce organic vegetables which are free from pesticides, insecticides or any sort of harmful chemicals which are injected or absorbed by the plants during their growth in farms or fields and breed fish together. Aquaponic Gardening is a basic three system function which helps you to grow vegetables and breed fish at the same time; it's one of those things which you can do in your own backyard. It consists of breeding fish in a tank, using the waste of the fish as a fertilizer for the vegetables and then the same water that is provided to the plants is used by the fish. We can basically say that Aquaponic is the integration of Aquaculture i.e. the breeding of fish and Hydroponics i.e. growing of plants in water without soil. Scientifically said, Aquaponic is a food production system which involves Aquaculture and Hydroponics in a symbiotic environment. Hence, after going through this book you'll be able to find yourself in an easy position to make your own Aquaponic Garden and can always have yourself a fish and veggie dinner at any time. Aquaponic gardening is a great method for raising fish and vegetables together. Aquaponic farming is a sustainable and commercially profitable way of organic farming. The waste of the fish will get converted by bacteria to nitrates, which the plants will feed on. It's a closed loop system. In the beginning you need to test your water frequently but after a few weeks, it doesn't need much maintenance anymore. The fish waste will almost create all the nutrients except a few which you will have to add yourself.

Aquaponic Gardening for Beginners - Step by Step Guide to Getting Started on Raising Fish and Growing Vegetables in an Aquaponic Garden Looking to try aquaponic gardening and don't know where to start?The concept of aquaponics is so amazingly simple that it is rather surprising it isn't used more often in everyday life. It is a brilliant example of "the circle of life" concept and perhaps exactly one of the ways created in order for us to live off the earth without destroying it. It could be used worldwide to combat nutrition deficits and starvation in a relatively inexpensive way that does not damage the environment. Not only does aquaponics work constructively with nature to provide food sources that are sustainable, it is also a great method to use for eating healthier without having to worry about the chemicals present in so many of the food chains we use today. This book will teach you enough about aquaponics to let you get started with your own system. This is something that anybody can pick up with no prior experience.
