~~Gold prospecting~~

Wikipedia

The first and most important step in mining placer gold is to find the deposit. If you find a placer gold deposit with considerable amounts

Download Ebook Gold

of gold worth mining, then you need to find out if the area is free so that you can stake a claim or if someone already owns the claim so that you can lease the claim. This is important so that you don't run into legal problems relating to mineral trespass.

~~What is Placer Gold
and How do You Find
it....~~

Prospecting for gold -
a quick primer: While
you can find small
amounts of natural
gold just about
everywhere, finding
concentrated gold
deposits takes a little
knowledge of just how
gold gets around.
Gold is very heavy.

Download Ebook Gold

Actually, gold is about 19 times as heavy as water - about 3 times as heavy as iron.

Knowing this makes finding it much easier.

deposits that can be profitably mined. If a good deposit is found, the prospector will get a claim covering the area and either mine it or sell it.

Prospecting is done in Placer Areas so that the prospector can get a claim.

Exploration means pretty much the same thing as prospecting.

Alluvial or eluvial deposits are the most common type of placer gold, and are often the richest. They contain pieces of gold that have been washed away from the lode by the force of water, and have

Download

Ebook Gold

been deposited in sediment in or near watercourses or former watercourses. Therefore, they are mostly found in valleys or flood plains.

~~Placer mining~~

~~Wikipedia~~

The Geology of Placer Deposits A placer deposit is a concentration of a

Download Ebook Gold

natural material that has accumulated in unconsolidated sediments of a stream bed, beach, or residual deposit. Gold derived by weathering or other process from lode deposits is likely to accumulate in placer deposits because of its weight and resistance to corrosion.
