In this groundbreaking book, a leading clinical psychiatrist redefines how we think about and treat victims of trauma. A "stunning achievement" that remains a "classic for our generation." (Bessel van der Kolk, M.D., author of The Body Keeps the Score). Trauma and Recovery is revered as the seminal text on understanding trauma survivors. By placing individual experience in a broader political frame, Harvard psychiatrist Judith Herman argues that psychological trauma is inseparable from its social and political context. Drawing on her own research on incest, as well as a vast literature on combat veterans and victims of political terror, she shows surprising parallels between private horrors like child abuse and public horrors like war. Hailed by the New York Times as "one of the most important psychiatry works to be published since Freud," Trauma and Recovery is essential reading for anyone who seeks to understand how we heal and are healed.

Deals with healing for sexual, physical, or emotional abuse through self-examination and activities.

God's love is steadfast for survivors who chose to leave an abusive marriage but still suffer the aftershocks When someone leaves an abusive marriage, life isn't instantly fixed. Dr. Bessel van der Kolk, one of the world 's foremost experts on trauma, has spent over three decades working with survivors. Thriving After Trauma addresses readers who have experience trauma or loss due to a variety of experience – whether accident, abuse, or injury. Shari Botwin shows readers, through personal stories, how many who have experienced the worst kinds of trauma have managed to move on and thrive beyond their experiences. Often, those who live through trauma come away with feelings of shame, guilt, anger, and despair. These are common, even normal, responses in the immediate aftermath. Left unaddressed, though, those feelings may develop into substance abuse problems, eating disorders, depression, or anxiety. Learning how to move on, to pick up and live life again, takes effort and guidance. Botwin guides readers through the stories of others who have gone on to live fulfilling, happy lives, and provides tips and tools for healing and moving on. Letting go of the shame, guilt, anger and fear associated with tragic events is crucial to reclaiming a full life. Strategies such as, journaling, mindfulness, cognitive-behavioral restructuring, and healthy relationships to aid in recovery are explored and explained, so readers can adopt those strategies that work best for them. It is not the trauma itself that results in so many people developing self-destructive tendencies and life threatening illnesses. It is the lack of having a way to digest and make sense of the trauma-related feelings that can lead one to mental illness, disconnection, and in some cases, even death. Readers will learn how to live with the trauma versus how to get over the trauma, so they can move forward healthfully and mindfully.
