Dangerous Crossings interprets disputes in the United States over the use of animals in the cultural practices of nonwhite peoples.

During the 2010s, science fiction’s immortal adversaries King Kong and Godzilla, representing our conflicts per Carl Sagan’s “dream dragons” analogy, made comebacks in American cinema. The blockbuster Kaiju resurged onto the screen, depicting these protectors of an Earth plagued by mankind’s hubris and folly. With Earth’s future hanging in the balance, their climactic 2021 staging settled a score between the two giant monsters, resolving Toho’s classic 1963 film King Kong vs. Godzilla. As formidable creatures emerging from Time’s Tomb on Mother Earth, metaphorical Kong and Godzilla are considered here in light of new millennial environmentalism’s stark reality. This book, nostalgic in tone, explores the meaning of Kong and Godzilla as planetary saviors--titanic protectors of a theoretical “living Earth” Gaia--defending the globe from a prehistoric plague of adversaries.

The best-selling Honda ever, the long-running Honda Mini Trail, was available in a huge range of models, even within each model year. The Honda Mini Trail Enthusiast’s Guidecovers all Honda Mini Trails and Z50 bikes produced between 1968 and 1999. Author Jeremy Polson begins with a brief introduction of the models that led up to the Mini Trail, and then jumps into a thorough analysis of the many models and iterations that Honda has offered through the years. Despite the worldwide popularity of Honda’s best-selling model, no other Mini Trail book had been published, and the accuracy of information found on the Internet is suspect at best. For Z50 collectors and enthusiasts, this book presents facts and figures found nowhere else. In addition to the hard facts regarding each model of each year, this book is filled with many rare photos that track the evolution of the Mini Trail, and unravel its mystery.
