Australia has some of the world's largest and most labor-efficient farms, and tractors are an essential part of their operations. The average Australian farm has three or more tractors. In this historical overview, the author documents the development of the indigenous tractor industry, from the McDonald Imperial of 1909 to more recent cane, olive, and grape harvesters. Australian Tractors puts the industry in an economic and social history context.

Revised and updated, this compendium helps readers identify and understand the scope of key government reference sources-traditional books (including publications catalogs and telephone directories); information clearinghouses; and materials in new formats, such as CD-ROMs, datafiles, and Internet sites. The authors focus on free information and depository materials-both readily available through toll-free phone numbers, mail or e-mail requests to agencies, or federal depository library collections. Materials are fully described in annotations that differentiate between similar materials, identify typical citation formats, and note common abbreviations

a global view of HIV infection 30 million adults living with HIV/AIDS as of end 1997

This fully updated second edition the work previously known as The Handbook of Humanitarian Law in Armed Conflicts sets out an international 'manual' of humanitarian law in armed conflicts accompanied by case analysis and extensive explanatory commentary by a team of distinguished and internationally renowned experts. Topics examined include the historical development, legal basis, and scope of application of international humanitarian law; methods and means of combat; protection of the civilian population, and of the wounded, sick or shipwrecked, and of prisoners of war; the protection of cultural property; the law of neutrality; and the enforcement of international humanitarian law. This edition also incorporates new chapters covering the law of non-international armed conflicts and international peace operations. Highly topical issues including the role of the UN security council, the relevance of International Humanitarian Law in peacetime and post-conflict military operations, and enforcement through trials for war crimes in national and international courts are also discussed.
