Why do some companies continue to be successful while others experience difficulties and even failure? In *Leading Strategic Change*, Eric Flamholtz and Yvonne Randle demonstrate that the key to long-term organizational success is the ability to adapt to and manage different types of change. Drawing on over 30 years' consultancy experience within major firms, they combine theoretical and practical models of organizational change, together with a new theory of leadership, to build a framework for understanding, planning, and leading change. The scope and value of this framework is then shown in relation to nine real-world case studies, ranging from relatively small companies (IndyMac Bank, Infogix) to large multinationals (Starbucks, Westfield). The focus throughout is to provide practical guidance to those concerned with managing and leading change in organizations. This book is an excellent guide to the many lessons to be learned about successful organizational change.

The ICETE Programme for Academic Leadership (IPAL) was officially established in 2010 and arose out of the need to provide training to theological institutions in different regions of the world. IPAL provides a three-year cycle of four-day seminars for the professional development of evangelical academic leaders to help institutions in their pursuit of quality and excellence. This publication is the first of three volumes intended to accompany and support the IPAL seminars as well as independently providing wider access to the principles required by academic leaders for institutional development. Each chapter shares and illustrates the contributors' expertise in and understanding of education, leadership and administration in the field of evangelical academic institutions. With an intentional awareness of a wide range of non-Western contexts this volume is a much-needed guide for senior administrators around the world.

Change Management is a crucial process for gaining the competitive advantage that is the goal of many organisations. Leaders and change agents are often faced with conflicting challenges of motivating and understanding increasingly diverse workforces, accounting to stakeholders and planning for the future in a chaotic environment. *Organisation Change: Development and Transformation*, 7e takes both an organisational development and transformational approach to change, to reflect the environment of change faced by organisations today. With the field of organisational change continuing to evolve, especially in an international context, future directions of change management are also discussed. To emphasise the relationship between theory to practice, this text provides 10 local and international case studies, practitioner vignettes and a suite of online cases supported by a case matrix.

MATHEMATICAL EXCURSIONS, Fourth Edition, teaches you that mathematics is a system of knowing and understanding our surroundings. For example, sending information across the Internet is better understood when one understands that prime numbers are connected to credit card transactions; that compound interest is connected to student loans; and that the perils of radioactive waste take on new meaning when one understands exponential functions are connected to the disasters at Fukushima, Japan. The efficiency of the flow of traffic through an intersection is more interesting after seeing the system of traffic lights represented in a mathematical form. These are just a few of the facets of mathematics you will explore with this text. MATHEMATICAL EXCURSIONS will expand the way you know, perceive, and comprehend the world around you. Enjoy the journey! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

In 2001, we gathered a group of researchers in Nice, France to focus discussion on performance measurement and management control. Following the success of that conference, we held subsequent conferences in 2003, 2005, 2007, and 2009. This title contains some of the exemplary papers that were presented at the most recent conference.

Building Family Business Champions provides a theoretically sound and practical framework for understanding the challenges that family businesses face. Drawing on three decades of consulting with more than 250 companies, their own experience running a family-owned firm, and sound research, Eric G. Flamholtz and Yvonne Randle explain that the success of these companies hinges upon the dual management of family functionality and the company's infrastructure. They present a set of managerial tools for planning, structuring the business, measuring performance, and managing culture. After laying this groundwork, they attend to issues that uniquely pertain to these companies, such as succession and the challenges of familial dysfunction. Finally, the book offers a set of short self-assessments that can be used in any family business. Richly illustrated with stories of companies at various stages of growth from around the globe, this book provides a comprehensive guide for building businesses that thrive from generation to generation.

With over one million copies sold worldwide, Exploring Strategy has long been the essential strategy text for managers of today and tomorrow. From entrepreneurial start-ups to multinationals, charities to government agencies, this book raises the big questions about organisations- how they grow, how they innovate and how they change.

Exploring Strategy, 12th Edition, by Whittington, Angwin, Regner, Johnson and Scholes has long been the essential introduction to strategy for the managers of today and tomorrow and has sold over one million copies worldwide.
