The Manual for Railway
Engineering (MRE) is an
annual publication released
every April. The Manual
consists of more than 5,000
pages of railway engineering
reference material, the
recommended practices for
the industry. It contains
principles, data,
specifications, plans and
economics pertaining to the
engineering, design and
construction of the fixed
plant of railways (except
signals and communications),
and allied services and
facilities.

Various other civil engineering skills were also involved in the construction of early railways. These included the building of bridges, tunnels and gravity walls as well as extensive earthworks and drainage. From these earliest days, there was a need to balance the requirements and interests of the various engineering disciplines involved.
