Manual Review *Manual Of The Planes 1st*

The Manual of the Planes is a manual for the Dungeons and Dragons role-playing game. This text addresses the planar cosmology of the game universe. The original book was published in 1987 by TSR, Inc. For 2nd Edition, concern over inclusion of angels and demons led TSR to forgo the release, though they compensated years later with the Planescape campaign setting. A third edition version of the Manual of the Planes was published in 2001 by Wizards of the Coast, while a new version for 4th Edition

I did not like the Manual of the Planes at all. The Outer Planes were okay but everything else needed to go. The Wonderland modules, the 3E FR and Eberron cosmologies, Beyond Countless Doorways, and the City of Brass boxset were much better examples of how the planes should be: fun places to adventure.

[AD&D 1st Edition] Manual of the Planes...

Where To Download Manual Of The Planes 1st

Manual of the Planes is more than just a listing of the homes of the devils, demons, celestials, and elementals. It provides the tools that you can use to create your own universes and cosmologies. You can customize the layout of your planes just as you do the nations and cities of your adventures—and the planes have infinite potential for expansion.

Manual of the Planes

The elemental planes I believe are still perfectly relevant in the 5th edition Forgotten Realms cosmology, but for someone playing 1st edition (or 2nd for that matter), and wants to delve even slightly into the planes, it's a must-have.
