Frequently in physics we encounter pairs of functions related by an integral of the form F(α) = b a f(t)K(α, t)dt. (15.1) The function F(α) is called the (integral) transform of f(t) by the kernel K(α, t). The operation may also be described as mapping a function f(t)in t-space into another function F(α)inα-space. This interpretation takes on
