Microbiology Laboratory Course Syllabus & Objectives

LABORATORY COURSE OBJECTIVES . IN THE BIO 2421 LABORATORY, students will learn to: Recognize and comply with the " Biology Laboratory Safety Policies for Students, Staff and Faculty. " Recognize and comply with generally accepted rules for microbiology laboratory health and safety, clean-up, decontamination, disinfection, and disposal of hazardous materials.

Syllabus - Microbiology

Laboratory: 30% (Points will be converted to a percentage.) Laboratory is an important and integral part of your education in microbiology. During laboratory, you will learn microbiological techniques, collect data, and apply these techniques and data collection procedures to identify unknowns and design experiments.

Syllabus - Microbiology

Instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, quality control, quality assurance, safety, setup, identification, susceptibility testing, and reporting results.

Syllabus - Clinical Microbiology

Course description: The purpose of this semester of Microbiology is to familiarize the student with those concepts that are basic to viruses and prokaryotic and eukaryotic cells. Lecture is the foundation of the course.

MICROBIOLOGY Syllabus

The fundamentals of microbiology: Lectures are focused on the structure of prokaryotic and eukaryotic microorganisms, host-microbe interactions, immunity and human infectious diseases. Laboratory sessions are focused on pure culture techniques, methods of staining and the microscopic, colonial and biochemical identification of microorganisms.

GENERAL MICROBIOLOGY (BIO3302) SYLLABUS

MEDICAL MICROBIOLOGY SYLLABUS. COURSE OBJECTIVES. Medical Microbiology introduces basic principles and then applies clinical relevance in four segments of the academic preparation for physicians: immunology, bacteriology, mycology, and virology. (Parasitology is covered in the Pathology course.) This rigorous course includes many etiological agents responsible for global infectious diseases.

MEDICAL MICROBIOLOGY SYLLABUS

microbiology, including collection, setup, identification, susceptibility testing, and reporting procedures. The laboratory exercises will endeavor to provide the student with the most comprehensive experiences

Syllabus - Microbiology

Course Syllabus MLAB2434 – Clinical Microbiology Catalog Description: Instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, quality control, quality assurance, safety, setup, identification, susceptibility testing, and reporting results.

Course Syllabus MLAB2434 Clinical Microbiology

Welcome to Microbiology! The overarching goals for the laboratory portion of this course are to teach microbiological techniques and to show students the impact of microbes on our daily lives and their central roles in nature. During the semester, we will discuss essential laboratory techniques that will allow us to investigate the structure and physiology of microorganisms.

Microbiology Lab - MOLB 2210

This course introduces microbiology to students in the health sciences. It explores the morphology, physiology, cultivation, and control of microorganisms, a survey of human pathogens, and the fundamental concepts of immunity. Laboratory experiments are an integral part of this course.

BIO 125 - Introductory Microbiology I Delaware Technical

Important Information The information posted on this page includes the syllabus information required by Texas House Bill 2504. A link to the complete course syllabus (with additional information about required course materials, grading, instructional methodology, course procedures, and course policies) is available on Dr. Allen-Mieri's Blackboard course site for BIOL 2421 and on links from the ...

Syllabus - Microbiology

The course learning objectives is to provide the core principles and specialized knowledge of Carbohydrates, Lipids, Proteins, Vitamins, Porphyrin, cellular transport, law of thermodynamics, Lipid and Nitrogen metabolism.

Department of Microbiology School of Life Sciences

Download Guidelines. ASM 's curriculum guidelines provide a set of concepts and example learning outcomes applicable to any undergraduate general microbiology course. The guidelines are not meant to be a mandate or an infringement upon academic freedom, but are curriculum recommendations.

ASM Curriculum Guidelines for Undergraduate Microbiology...

OBJECTIVES You are expected to become familiar with (1) observation and manipulation of microorganisms, (2) preparation of media and culturing, (3) the utilization of stains to observe microbial structures and other tests for microbial identification, and (4) develop independence on research skills and sources of scientific information.
