release. Some other helpful items are a flashlight, a lens hood, and an extra battery. For exposure, start with moderate ISO (around 400) and aperture (around f/5.6-8) and see where that puts your shutter speed.

The Ultimate Guide to Night Photography

The truth is that your night time photography will have long exposures anyway and you'll be shooting on a tripod for stability. Lower ISO settings will give you much less digital noise, especially in the dark shadow areas of your photo, which night photos usually have a lot of. Set your ISO for somewhere between ISO 100 and ISO 800.

3 Ways to Photograph the Night Sky - wikiHow

Night photography is in many ways the opposite of regular landscape photography. During the daytime, a low ISO is preferred due to less noise and grain. During the night, however, it's often pitch black and using the same settings as in the daytime will result in, you guessed it, pitch-black images.
