"When I was born on May 26, 1963, I had already broken a law: homosexuality was illegal in Texas..." Dolph Crawford used his pretty-boy looks to wrangle his way to fortune and fame. But along the way, his life was filled with the inevitable ups and downs of a young gay boy growing up in mostly heterosexual Texas. Alienation, shame, and self-hatred were the substance of his youth, and when he left home in his teens he didn't fare much better. Fueled by confusion and pain, he entered the alluring but toxic world of male hustling, dancing, and eventually signed with Vivid Entertainment to act in, produce, and direct some of the company's most popular gay porn videos. Now Dolph bares all in a revealing memoir that rips the glamour off the video industry as effectively as it unearths the enduring pain of growing up gay in America.

This book traces the tradition of American historical fiction from its origins in the early nineteenth century to the eve of World War II. It examines the historical novel's connections with Enlightenment and Romantic theories of history; with the rise of literary regionalism; with the ambitions of Romantic writers to revive the epic and romance; with changing conceptions of gender roles; and with the authors' troubled responses to the great revolutionary and imperialistic conflicts of the modern era. However, though inevitably much concerned with the theory of genre and with the specific contents of the genre of historical romance, Professor Dekker devotes most of his book to new readings of major texts by James Fenimore Cooper, Nathaniel Hawthorne, Herman Melville, Mark Twain, Allen Tate, Edith Wharton, Willa Cather, and William Faulkner, as well as to the Briton whose name was synonymous with the genre for most of the nineteenth century - Sir Walter Scott. 'The American Historical Romance is the richest, most fully meditated and most rewarding yet written by this author ... It is the most important book on the relations of British and American fiction to come out for many years. No devotee of the American novel will ignore it.' -- The Times Literary Supplement.

First published between 1982 and 1983, this series examines the peculiarly American cultural context out of which the nation's literature has developed. Covering the years from 1620 to 1830, this first volume of American Literature in Context examines a range of texts from the writings of the Puritan settlers through the declaration of Independence to the novels of Fenimore Cooper. In doing so, it shows how early Americans thought about their growing nation, their arguments for immigration, for political and cultural independence, and the doubts they experienced in this ambitious project. This book will be of interest to those studying American literature and American studies.

First published between 1982 and 1983, this series examines the peculiarly American cultural context out of which the nation's literature has developed. Covering the years from 1620 to 1930, these four volumes present a coherent, consecutive and comprehensive sequence of interpretations of major American texts, including fiction, non-fiction, poetry and drama. Every chapter includes an extract from the chosen text which serves as a springboard for wider discussion and analysis. Each analysis demonstrates how students can move into and then from the pages of literature to a consideration of the whole text, and thence to an understanding of the author's oeuvre and of the cultural moment in which he or she lived and wrote. This set will be a valuable resource for students of American literature and American studies.
