Oracle@ Service Contracts
Oracle Service Contracts integrates with Oracle Advanced Pricing to determine the contractual prices to be applied to a service. Services can be fixed price, or priced as a percentage of the value of covered goods. Price modifiers, resulting in a surcharge or discount, can be applied to service prices based on pre-defined conditions.

ORACLE SERVICE CONTRACTS
In most cases, Oracle Service Contracts retrieves the contractual prices of services or usage from Oracle Advanced Pricing, however, pricing is done manually in some situations. Renewals: Define the renewal rules that are applied during manual or automatic renewal of the contract.

Learn to build and implement a robust Oracle E-Business Suite system using the new release, EBS 12.2. This hands-on, real-world guide explains the rationale for using an Oracle E-Business Suite environment in a business enterprise and covers the major technology stack changes from EBS version 11i through R12.2. You will learn to build up an EBS environment from a simple single-node installation to a complex multi-node high available setup. Practical Oracle E-Business Suite focuses on release R12.2, but key areas in R12.1 are also covered wherever necessary. Detailed instructions are provided for the installation of EBS R12.2 in single and multi-node configurations, the logic and methodology used in EBS patching, and cloning of EBS single-node and complex multi-node environments configured with RAC. This book also provides information on FFW used in EBS 12.2, as well as performance tuning and EBS 12.2 on engineered system implementations. What You Will Learn:/bbr/pdivpp/pulllUnderstand Oracle EBS software and the underlying technology stack components/bbr/l11lInstall/configure Oracle E-Business Suite R12.2 in simple and HA complex setups/bbr/l11lManage Oracle EBS 12.2br/l11lUse online patching (adop) for installation of Oracle EBS patchesbr/l11lClone an EBS environment in simple and complex configurationsbr/l11lPerform and tune Oracle EBS in all layers (Application/DB/OS/NW)br/l11lSecure E-Business Suite R12.2br/l1/l1/divbrWho This Book is For:/bp/pp/pp/pp/pp/p Developers, data architects, and data scientists looking to integrate the most successful big data open stack architecture and how to choose the correct technology in every layer

Service Systems Implementation provides the latest applications and practices aimed at improving the key performance indicators of service systems, especially those related to service quality, service productivity, regulatory compliance, and sustainable service innovation. The book presents action-oriented, application-oriented, design science-oriented (artifacts building: constructs, models, methods and instantiations) and case study-oriented research with actionable results by illustrating techniques that can be employed in large scale, real world examples. The case studies will help visualize service systems along the four key dimensions of people, information, technology and value propositions which can help enable better integration between them towards higher value propositions. The chapters, written by leading experts in the field, examine a wide range of substantive issues and implementations related to service science in various industries. These contributions also showcase the application of an array of research methods, including surveys, experiments, design science, case studies and frameworks, providing the reader with insights and guidelines to assist in building their own service systems, and thus, moving toward a more favorable service customer and provider experience. Service Systems Implementation, along with its companion text, the Science of Service Systems, is designed to present multidisciplinary and multisectoral perspectives on the nature of service systems, on research and practice in service, and on the future directions to advance service science. These two volumes compose a collection of articles from those involved in the emerging area known as service science.

Implement the Full Spectrum of Oracle E-Business Suite Financial Applications Maintain an integrated, customer-focused financial computing framework that meets global business requirements while lowering total cost of ownership.
