a drop of solvent on the same point as the one you drew the dot on, you will separate the ink into its different colours and the result will look similar to this:

Chromatography Worksheet - EdPlace

Worksheets and lesson ideas to challenge students aged 11 to 16 to think hard about chromatography (GCSE and Key Stage 3) Chromatography is a really useful tool to separate out a mixture containing many dissolved solids (solutes). To really understand chromatography students must understand the concepts of solute, solvent, solution and solubility.

Chromatography teaching resources | the science teacher

Read PDF Paper Chromatography Worksheet

Paper chromatography is a method that is used to separate out materials from a mixture. A solvent such as alcohol or water is used to dissolve the components of a mixture. The solvent travels up the paper by capillary action. The particles of solute that are dissolved in the solvent are carried up the paper along with the solvent.
