This book details the development and impacts of anti-sexism professional development (PD) workshops for preservice teachers. Designed to help teacher candidates recognize gender inequity and think more deeply about their role as anti-sexist educators, *Dismantling Educational Sexism through Teacher Education* explores how workshops can respond directly to issues manifesting in US schooling such as misrepresentation, androcentric pedagogy, and

sexual(ist) harassment using an intersectional approach. By documenting participants' learning, the text offers valuable insight into how teacher candidates view their role in combatting sexism and illustrates how an anti-sexism curriculum can positively impact on educators' beliefs, discourses, and teaching practices. This volume will be a valuable resource for researchers and scholars involved in teacher education and issues of gender equity more broadly, as well as teacher educators seeking a theoretical framework for anti-sexism

Teacher Education and Practice, a peer-refereed journal, is dedicated to the encouragement and the dissemination of research and scholarship related to professional education. The journal is concerned, in the broadest sense, with teacher preparation, practice and policy issues related to the teaching profession, as well as being concerned with learning in the school setting. The journal also serves as a forum for the exchange of diverse ideas and points of view within

these purposes. As a forum, the journal offers a public space in which to critically examine current discourse and practice as well as engage in generative dialogue. Alternative forms of inquiry and representation are invited, and authors from a variety of backgrounds and diverse perspectives are encouraged to contribute. *Teacher Education & Practice* is published by Rowman & Littlefield.

Exploring Spirituality and Culture in Adult and Higher Education is written from

the unique perspective of teacher, researcher, and author Elizabeth Tisdell who has extensive experience dealing with culture, gender, and educational equity issues in secular adult and higher education classrooms, and formerly in pastoral and religious education settings on college campuses. This important book discusses how spiritual development is informed by culture and how this knowledge is relevant to teaching and learning. For educators, an understanding of how spirituality is informed by culture, and how spirituality assists in

Offers research on educational policies, programs, and practices for adolescent girls and young women, from both comparative and international perspectives.

Sex education, since its advent at the dawn of the twentieth century, has provoked the hopes and fears of generations of parents, educators, politicians, and reformers. On its success or

failure seems to hinge the moral fate of the nation and its future citizens. But whether we argue over condom distribution to teenagers or the use of an anti-abortion curriculum in high schools, we rarely question the basic premise--that adolescents need to be educated about sex. How did we come to expect the public schools to manage our children's sexuality? More important, what is it about the adolescent that arouses so much anxiety among adults? "Teaching Sex" travels back over the past century to trace the emergence of the "sexual adolescent" and the evolution of the schools'

efforts to teach sex to this captive pupil. Jeffrey Moran takes us on a fascinating ride through America's sexual mores: from a time when young men were warned about the crippling effects of masturbation, to the belief that schools could and should train adolescents in proper courtship and parenting techniques, to the reemergence of sexual abstinence brought by the AIDS crisis. We see how the political and moral anxieties of each era found their way into sex education curricula, reflecting the priorities of the elders more than the concerns of the young. Moran illuminates

the aspirations and limits of sex education and the ability of public authority to shape private behavior. More than a critique of public health policy, "Teaching Sex" is a broad cultural inquiry into America's understanding of adolescence, sexual morality, and social reform.

This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher

educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes

chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

What is the relationship of gender to the micropolitics of school reform? This book explores this timely research question, revealing the everyday struggles that happen between different factions of teachers with different definitions of what school means for students. The focus of this struggle, however, may not be on education, but rather on such underlying issues as

gender. Using case studies, the author shows how gender politics can be used by teachers to delay reform.
