The GET is the transition between the unsustainable solid energy sources of our past and the virtually limitless, clean sustainable energy sources of our future. The Grand Energy Transition tells how the GET is creating a clear and irrevocable energy path forward, and how the GET itself reveals the most likely energy winners and losers. Energy industry insider Robert Hefner makes the case that America is blessed with abundant, affordable supplies of natural gas that can be scaled up in the ...

The Grand Energy Transition: The Rise of Energy Gases ...

The energy transition is a pathway toward transformation of the global energy sector from fossil-based to zero-carbon by the second half of this century. At its heart is the need to reduce energy-related CO 2 emissions to limit climate change. Decarbonisation of the energy sector requires urgent action on a global scale, and while a global energy transition is underway, further action is needed to reduce carbon emissions and mitigate the effects of climate change.
