Trend following is a strategy, managed futures is a hedge fund category, and commodity trading adviser is the regulatory name designated by the US Commodity Futures Trading Commission for those who trade and manage futures portfolios. Not all CTAs or managed futures managers are trend followers.

Trend Following with Managed Futures: The Search for ...
Trend following strategies are implemented with managed futures. Managed futures attempt to capture a factor known as time-series momentum, or trend momentum. This factor consists of long exposure to assets with recent positive returns and short exposure to assets with recent negative returns. The strategy is agnostic to the type of assets, meaning that it can be implemented with equities, fixed income, commodities and currencies. Managed futures have historically proven to have strong ...

Trend Following with Managed Futures | Wiley Online Books
Given the rather stable performance of trend following over a turbulent period for equity markets, this gives rise to several questions. What would happen if the trend-following index had the same volatility? Or even more interesting, what would happen if equity markets and trend following were combined 50/50.

Trend Following with Managed Futures - The Hedge Fund Journal
Trend following is the most common trading system employed by managed futures. In general, a trend following system aims to invest in the direction of the long-term trend of a commodity, interest rate, exchange rate or equity index. A trend is considered the dominant direction of movement for a market over a specified timeframe.

Trend Following Isn ' t the Only Managed Futures Strategy
managed futures industry has been primarily associated with quantitative trend-following strategies. These are systematic rules-based strategies that seek to identify trends in prices, establishing long or short positions accordingly. More recently, evolution in technology, data and markets has spawned a sophisticated new breed of managers who

Managed Futures — Beyond Trend Following
Is trend following too big? Can managed futures do it without the bond tailwind they ' ve had for 30 years? Does globalization take away diversification? We ' re debunking these trend following myths/truths (?) in today ' s podcast — and today ' s guest is ideal to take us through the ins-and-outs of these trend following theories.

Debunking Trend Following's Dead Theories with Kathryn ...
The primary driver of most managed futures strategies is trend-following or momentum investing; that is, buying assets that are rising and selling assets that are declining.4 These strategies are typically applied to liquid exchange-traded futures contracts on various commodities, equity indices, currencies and/or government bonds.

Amazon.com: Trend Following with Managed Futures: The ...
At and after these breaks trend following tends to place bad bets because trailing returns can reflect an older, inactive trend direction. " Faster trend signals (e.g., only a few months of trailing returns), rather than solving the problem, increase the tendency of placing bad bets because faster signals often reflect noise instead of a true turn in trend. "

Trend Following Research: Breaking Bad Trends
It ' s very far from easy to trade trend following managed futures. You will lose on up to 70% of all trades. Often you will have big losses. The day to day volatility can be severe at times.
