Vacuum switches now dominate the medium-voltage sector (below 30 kV) for all power switching functions. Allan Greenwood is a world authority in this field; in this book he shows how vacuum arcs and current interruption in vacuum are different from gaseous arcs and interruption in gas circuit breakers, and leads the reader to understand these differences - thereby enabling successful design, construction and use of vacuum switchgear. This comprehensive treatment (including an introductory historical perspective) makes the book useful for users and

manufacturers as well as designers.

This CIGRE Green Book provides the entire know-how about switches in a high voltage system. The switching equipment includes circuit breakers, vacuum interrupters, disconnecting switches, and earthing switches used in AC & DC transmission and distribution systems. The Green book describes different switching equipments and their roles in the power systems. It explains the fundamental switching behaviors in power systems targeted for practitioners and students and joining electrical industries. The Green book also covers fundamental specific subjects including DC circuit breakers, controlled switching, fault current limiting devices and future technologies. Like all Green books, this book covers the cumulative understanding of numerous experts in the CIGRE study committee. It offers the approved and outstanding practical knowledge of CIGRE Study committee A3 and was collected by Dr. Hiroki Ito.

The world of Sub-Saharan African music is immensely rich and diverse, containing a plethora of repertoires and traditions. In *The African Imagination in Music*, renowned music scholar Kofi Agawu offers an introduction to the major dimensions of this music and the values upon which it rests. Agawu leads his readers through an exploration of the traditions, structural elements, instruments, and performative techniques that characterize the music. In sections that focus upon rhythm, melody, form, and harmony, the essential parts of African music come into relief. While traditional music, the backbone of Africa's musical thinking, receives the most attention, Agawu also

supplies insights into popular and art music in order to demonstrate the breadth of the African musical imagination. Close readings of a variety of songs, including an Ewe dirge, an Aka children's song, and Fela's 'Suffering and Smiling' supplement the broader discussion. The African Imagination in Music foregrounds a hitherto under-reported legacy of recordings and insists on the necessity of experiencing music as sound in order to appreciate and understand it fully. Accordingly, a Companion Website features important examples of the music discussed in detail in the book. Accessibly and engagingly written for a general audience, The African Imagination in Music is poised to renew interest in Black African music and to engender discussion of its creative underpinnings by Africanists, ethnomusicologists, music theorists and musicologists.

With over 200 indicators available to traders, it is impossible to pick the ones that will make money over and over again...until now. A two-time, best-selling author and writer of a weekly commentary at www.incometrader.com, Mark Larson is an expert trader willing to share the secrets of his favorite technical tools. To maximize the power of this guide, you'll also receive the full 90-minute DVD and access to an interactive online review tool at Traders' Library's Education Corner, including self-tests that make sure you absorb every valuable strategy. Inside this coursebook, you will learn how to: Leverage parameters to make your indicators profitable in both bear and bull markets; Combine the most powerful indicators on one chart to create a winning trading system; Optimize your entries and exits with specific indicators; Use ATR for setting stop losses; Utilize stock scans for a competitive edge. From standards like the MACD to newer tools like Time Segmented Volume and Inertia, Larson will teach you how each indicator works,
